Getting Started with Your Flashcards:

This set is designed for newborns and young infants, especially between 0–6 months, when their vision is still developing and black & white images are easiest to focus on.

✂️ Cutting Guide:

- Flashcards: one straight cut along the dotted line = two large cards

🖨️ Printing Tips

- Print on thicker paper or cardstock for durability
- Laminate if desired (or slide into sheet protectors)
- Print at "Actual Size" (100%) — avoid "fit to page"

🧠 How to Use Them

You don't need a schedule — just quiet moments and a little curiosity.
Try using the cards during:

- Tummy Time (prop up one card 8–12" from baby's face)
- Diaper Changes (tape a few above the table for distraction)
- On the Go (stash a few minis in the diaper bag or stroller)

Let baby's gaze be your guide — if they linger, perfect. If not, just try again later.

💬 A Note From Jenny

I created these in those early, fuzzy days with my own baby. They helped us find tiny moments of calm and connection — and I hope they bring that to you too.
